**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 30. A method for physical detection and tracking of devices on a computer network, the method comprising:

identifying a building comprising a first room and a plurality of rooms distinct from the first room;

identifying a computer network housed within the building and comprising

a plurality of outlets, each outlet thereof containing substantially exclusively, as its electronically active elements, electrical conductors carrying data signals unprocessed therethrough, at least one outlet of the plurality of outlets being housed within each room of the plurality of rooms,

a network infrastructure device selected from the group consisting of a switch, router, and hub, the network infrastructure device housed within the first room and comprising a plurality of ports, each port thereof operably connected to an outlet of the plurality of outlets corresponding exclusively thereto,

a plurality of devices housed within the plurality of rooms, each device of the plurality of devices connecting to the network infrastructure device via an outlet of the plurality of outlets;

storing and automatically updating, by the network infrastructure device, a connection table mapping each port of the plurality of ports to a corresponding device of the plurality of devices connected thereto;

installing and running, after the storing, reporting software on a first device of the plurality of devices;

installing and running, after the storing, correlating software on a device of the plurality of devices, the correlating software comprising a binding table mapping each port of the plurality of ports of the network infrastructure device to a corresponding room of the plurality of rooms;

directing, by the reporting software, the first device to query the network infrastructure device and obtain from the connection table a port identification corresponding to the first device; and

determining, by the correlating software, the location of the first device by locating the port identification within the binding table and retrieving from the bidding binding table information designating a room of the plurality of rooms mapped thereto.

***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: Applicant has defined the claimed invention clearly and distinctly. In particular, the amendments made to the claims define applicants claimed invention so that the claimed invention, as a whole, distinguishes over the prior art.
